

ZVOX
500 hours of hope

Bible Society
Making the Bible heard since 1817

The **Zvox** technology is the same size as this leaflet. These incredibly **tough iPod-like** audio players can hold up to **500 hours of hope**, life saving information and God's Word. **Zvox** is easy to use without an instruction manual. It's been proven in the harshest conditions and it can even be used where there is **no conventional means** of recharging its batteries, thanks to solar and hand-crank recharge capability. A built-in speaker means **group listening** is also part of the program. That's what makes it the ideal technology for this **critical mission**.
